

The diagram shows four blue squares, labeled M_1 , M_2 , M_3 , and M_4 , arranged in a descending staircase pattern from the top-left to the bottom-right. Each square is outlined with a thick orange border. The squares overlap such that the bottom-right corner of one square is positioned at the top-left corner of the next square. This creates a continuous orange path that follows the outer edges of the sequence of squares. The background is a light gray.
